I am deeply passionate about the intersections of cloud computing, software engineering, distributed systems, and parallel programming, with a keen interest in crafting intuitive UI/UX designs for various application systems. These domains resonate with my academic background and fuel my aspirations in the tech industry.

Qualifications

July 2022 - Present

(Expected Graduation: 08/24)

Tunku Abdul Rahman University of Management and Technology (TARUMT), Kuala Lumpur, Malaysia

Bachelor in Software Engineering

Pursuing a Computer Science degree, focusing on Software Engineering, Data Structures, Artificial Intelligence, and Cloud Computing.

Also delved into areas like Web Development, Graphic Programming, and Computer Security, complemented by foundational mathematical and HCI studies.

June 2020 - May 2022

Tunku Abdul Rahman University of Management and Technology (TARUMT), Kuala Lumpur, Malaysia

Diploma in Computer Science

Graduated with 3.7, covering core areas like Programming, Web Development, Systems Architecture, and Database Management.

My studies also included a solid foundation in Mathematics and specialized courses in Software Engineering, Data Mining, and Mobile App Development.

Work Experience

Junior Software/App Developer

AccountSoft Innovation Sdn Bhd

Oct 2021 - Jan 2022

Kuching, Sarawak

Responsible for developing customizable add-on functions in AutoCount software using SQL queries, API and Dev Express.

Responsible for developing a customisable Flutter mobile barcode scanner app for clients.

Part-Time Restaurant Chef
